COMPLIANT HOSTING, SECURITY & REMOTE ACCESS

NeoSystems specializes in providing highly scalable, robust, secure, and private hosting services for businesses looking to lower IT costs and increase operational efficiency.

Government contractors and commercial enterprises can set their businesses apart from the competition by using best-in-class software applications. Managing these software packages can be expensive and can distract from core business operations.

NeoSystems takes the task of application management off your hands. Our IT experts apply all patches, service packs, and hot fixes. Most importantly, we do this on your schedule. Our hosting facility is highly-secure and supported by our 24/7 help desk. And because NeoSystems hosts your solution, there is no need to worry about replacing aging hardware down the road.

▶ NeoSystems World-Class Hosting Provides:
- Secure, private cloud with geographically dispersed redundancy
- Fast connections via multiple gigabit pipes and 11 internet carriers
- Simultaneous, side-by-side test and production environments
- Service Level Agreements - Guaranteed

NeoSystems
Grow Ahead... We've Got Your Back Office.

☑ **System Maintenance**
Your systems require more than just great accountants to run it. You also need an IT staff that understands how to install the patches, service packs and hot fixes that are critical for system upkeep. Our team does all of this for you, while storing your data in our private cloud.
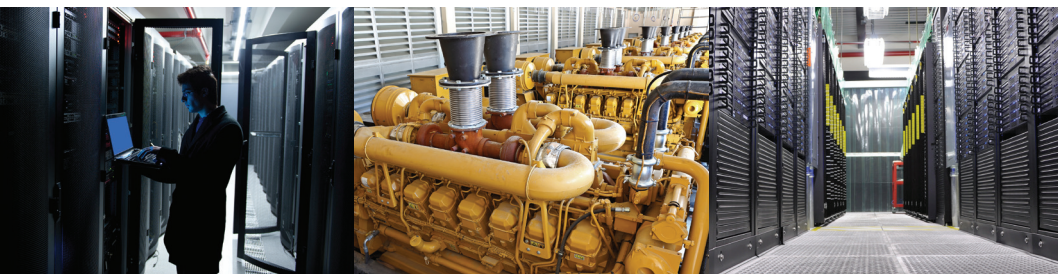

☑ **Business Continuity**
When servers fail or natural disasters occur, how does your business cope? NeoSystems provides redundant servers and a remote backup service to ensure that your business systems are always up and running and that data is never lost.

☑ **Remote Accessibility**
NeoSystems provides remote connectivity options that give your business secure access to vital information from any location with internet connectivity. Availability to time-sensitive data will allow you to seize business opportunities quicker, leading to more contract wins.
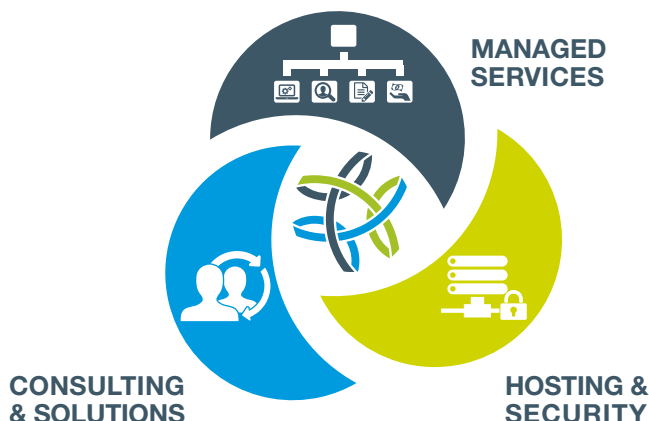

You Can Count On:
- ✔ Access Control
- ✔ Audit and Accountability
- ✔ Configuration Management
- ✔ Contingency Planning
- ✔ Identification & Authentication
- ✔ Incident Handling & Monitoring
- ✔ Maintenance & Media Protection
- ✔ Physical & Environmental Protection
- ✔ System & Information Integrity
